FYI. Curtis: it will be interesting on 24 Mar congressional call to see how STL COE visits affected thinking.

Subject: St. Louis Corps in DC this Week

Dear federally elected staffers,

It's MCE's understanding that St. Louis Army Corps of Engineers leaders are in Washington DC this week. MCE encourages you to reaffirm your support for the direct and primary involvement of the St. Louis Army Corps of Engineers FUSRAP at the West Lake Landfill in St. Louis County.

EPA Region 7 has only gone as far as to say that it is currently engaging the Army Corps of Engineers, not the St. Louis Army Corps of Engineers FUSRAP specifically for work on an "isolation barrier". It is unreasonable to have the KC Corps of Engineers as the lead Corps District for the isolation barrier considering radioactive wastes have been found twice in previously unidentified areas along the isolation barrier, the exact same rad-wastes the St. Louis Corps FUSRAP is handling at the Latty Ave site. Not to mention St. Louis FUSRAP is headquartered a few miles from West Lake Landfill.

Please ensure that EPA Region 7 and the Army Corps of Engineers gives the people, businesses, governments, emergency responders, and health care providers who live, work and play around the West Lake Landfill what they want, and that is the involvement of the St. Louis Army Corps of Engineers FUSRAP at the West Lake Landfill. I'm happy to provide an updated list of pro-STL FUSRAP entities at your request, including most recently the City of Bridgeton and Maryland Heights.

Thanks,
Ed Smith
